

PRESSURE FITTINGS

Fast and flexible

PRESSURE FITTINGS

Fast and flexible

We supply standard pressure fittings from DN04 to Dn76 at short notice in numerous step sizes. They are based on connection types according to international standards, for example SAE or DIN. The advantages are that different connection sizes and connection types can be combined with various hose integrators.

Highest safety

Pressure fittings for the high-pressure range are pulse-tested according to DIN EN ISO 6803. In addition, fittings in the very high pressure range have tear-off safety in the form of a separate interlock zone.

Hose integrators

We manufacture integrators for hydraulic pipe fittings for skive and no-skive. Since we have a substantial manufacturing depth and the corresponding equipment in terms of machinery, we can supply individual pieces, small batches or mass-produced series according to your requirement in:

- Soldered type
- Welded type
- Monoblock versions

Short delivery periods for catalogue products

Most of our catalogue products are stocked goods. If you have any questions regarding technical details, our employees are at your service.

Special dimensions and angle positions

Do you need special shapes? Developing and manufacturing special solutions for hydraulic components and systems is our strength.

Applications, e.g.:

1SN / 2SN / 1SC / 2SC / 2SN-K / 3SPC
4SP
4SH
R13 / R15
PTFE

Pressure fittings:

soldered, welded,
monobloc and ZAKO designs

Pressure fittings CEL straight

Updated at:
24.05.2022

Connection

Metric male thread 24° with inner cone and pipe connection L series

Standard

ISO 8434-1

Application

TE / SN / SC / SN-K / PTFE flexible tubes

Material

Steel

Surface protection

Zinc-electroplated

Pressure fittings DKR 45°

Updated at:
24.05.2022

Connection

Sealing head 60° outside cone with BSPP nut (G)

Standard

ISO 8434-6

Application

TE / SN / SC / SN-K / PTFE flexible tubes

Material

Steel

Surface protection

Zinc-electroplated
